

More from Dr. Jon Whale about Awakening the Avatar Within and his work:

In summer of 2016, Darren Starwynn travelled from California to visit me at my East Devon residence in the United Kingdom. It was a pleasure to meet him. Back then, we worked together on the diagnostics and realignment of the human Assemblage Point and Electronic Gem Therapy healing modalities.

These days, there seems to be an endless stream of books and Internet sites about healing and consciousness, Darren's book 'Invoke the Avatar Within You' stands out like a bright beacon of light.

Darren has done something new and different, very necessary in these sinister and destructive times of our planet Earths' human population, including fauna and flora and its habitats. He has provided a practical roadmap for evolving both our minds and physical bodies to a higher level of consciousness and vitality through the principles of epigenetics and spiritual alchemy. He has convincingly shown a way that people can become Avatars, and how awakened Avatars can join forces to literally change this world.

Within this book are a number of accounts of the benefits to individuals' health by realigning their Assemblage Point from a prejudicial location back to a healthy central location.

For any distressed, diseased or unbalanced person, they will naturally have a prejudicial Assemblage Point location and entry and exit angle.

Medical practitioners that fail to take into diagnostic account their patients' Assemblage Point location and entry and exit angle and subsequently neglect to carry out a necessary realignment procedure; Therapy modalities for example, psychiatry, psychology, counselling, chemical drug management, **aside from being expensive**, these will not be **that** successful in returning their patients back to normality. The reason is, practitioners of these and the countless other available therapy modalities, their work fails to correct the alignment of the patient's Assemblage Point back to the **optimum** healthy central location.

Today, in the compromised political and public domains, it is truly difficult to name any heros, Darren's work is indeed champion.

Jon Whale. PhD.

East Devon, U.K.
